

2021 San Antonio JAM DIVISIONS and CLASSES

The Agricultural Mechanics committee of the San Antonio Livestock show continues to strive to enhance and make improvements within our show. We will continue to improve competitiveness within divisions and create more incentives for students to participate with starter projects. Some classes within divisions have been expanded. Small Towable BBQ Pits, Disk Cookers and Fryers, Livestock Panels, & Patio Tables and Benches have been added. By placing these type projects in their own class, it will allow them to compete against one another for a class awards. We believe exhibitors will have a greater incentive to compete with starter projects and then grow their projects size and scope as they continue to compete at our show. Please look at the Naming, Describing, and Classification (NDC) document as the philosophy of placing some projects into classes has changed.
